

HIGH HEAT RESISTANT DURABLE CUSTOM RUBBER PARTS

SEYBERT vulcanized silicone rubber is extremely durable and is designed for both high temperature and room temperature applications. We custom manufacture parts to meet your application.

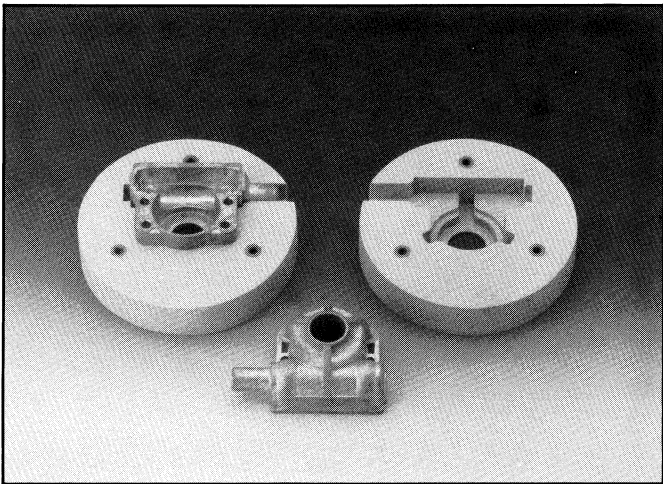

Examples of customer technical applications:

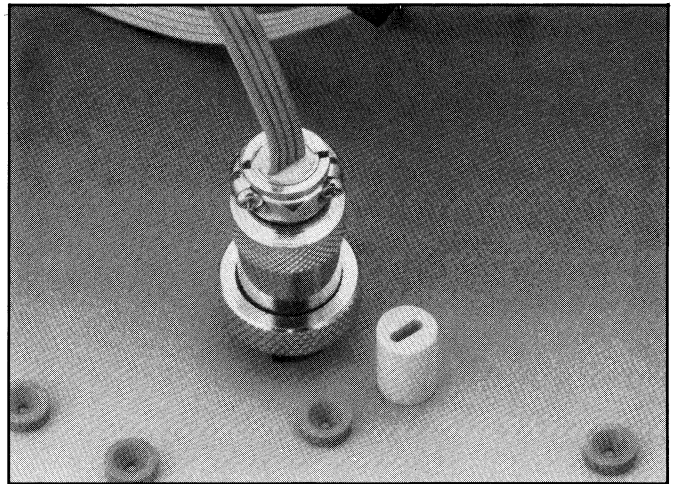

Vacuum pick-ups for computer chip manufacturing equipment.

Reusable covers for printed circuit board components used during wave soldering and conformal coating process. (eliminate costly masking).

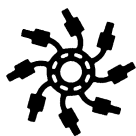

Reusable nest to hold gearbox securely (precise negative shape) and eliminate scratching of part during robotic assembly process.

Grommets used as a strain relief, holder, or retainer for any variety of custom applications. (i.e. flat wire in a round connector clamp).

Call **SEYBERT** for your other technical prototyping and short run needs—

- Zinc alloy castings
- Aluminum alloy castings
- Thermoset moldings (polyurethanes, epoxies)
- Injection moldings (inquire with your material specifications)
- Encapsulations and potted assemblies.
